BOTSWANA HOUSING CORPORATION**

**RE: 516 BHC HOUSES AT PHAKALANE ABOUT TO BE CONNECTED TO WATER AND
SEWER RETICULATION LINES**

Botswana Housing Corporation is happy to announce that a lot of progress has been made towards connecting its 516 houses in Phakalane to water and sewer reticulation lines in the area. It is anticipated that the houses would be connected and functional by end of August this year. People who are directly affected by the project, inclusive of those who purchased the houses, partially paid, and or made undertakings to purchase would be informed through detailed letters on when to expect the delivery of the respective houses in due course.

BHC regrets inconveniences caused.

Thank you
